selected projects FREEM open architecture

Villa Brackenridge

2015 Villa, Plettenberg bay, South Africa
Client: private client

Design of a private villa 660m2 in a sustainable estate at the coast with stunning 360degrees panoramas. The topfloor facade has a flexible facade to adjust to the windy climat. A lot of light comes into the house and a flexible routing gives you the opportunity for private and public use.

Beach Restaurant

2014 Kilifi, Kenya
Client: Hello Properties

Semi-open bar and restaurant at the Kilifi kreek covered by a endless roof. A colonnade entrance welcomes you into the bar. The open restaurant sets his tables outside for a real beach experience.

Rainarai Eco Lodge

2013 Eco lodge, Frenda, Algeria
Client: Rainarai

Design and visualization of the Rainarai Eco Lodge started with design thinking workshops to define the core wishes of the client. A complex that uses local energy and materials and the place gives an new, creative boost to people who will come to read, make art, or find other ways to express themselves. Work in progress.

Home at the shores

2013 Holiday residence, Kralendijk, Bonaire
Private client

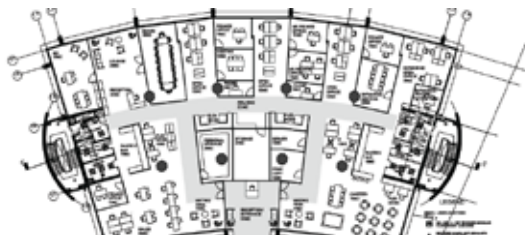

Design, project management and aesthetic construction control of an upgrade for a holiday residence and a new beach house in Bonaire. The residence is completely adjusted to make it a place for rental use: kitchen, bathrooms, lighting, terraces, infrastructure, etc. The guest rooms have become spatial and light, all build underneath the existing roof and with use of natural ventilation.

Community Barn

2012 Mixed use building, Almere
Client: Housing corporation Ymere

Design and research for an urban area development for self-build houses. What do you need if you will start building a new house in the middle of nowhere? The community barn supplies support functions for private housing clients such as a tool rental firm, daycare centre for children and an information centre. It is also a attractive place to come for new buyers.

Interior Office

2012, Maersk office, Ghana
Client: Bleij Design

Design and drawing for an office according to the principle of 'Het nieuwe werken' (Alternative workplace strategies).

Evolving House

2011 Family house, Broek en Waterland
Private client

A scenario design for a low budget house. The house evolves with the family needs and the financial possibilities. Extra spaces and functions can be build underneath the roof without regulations.

H2 Floating Residence

2010 3rd place Competition 'Sustainable Floating Living'
Client: Municipality Amsterdam East

Design of a self sufficient house boat. The engineering of the energy systems like solar-energy, hydrogen and compost were the starting point for the architectural design.

Rainarai restaurant

2009 Algerian restaurant Westergasfabriek, Amsterdam
Client: Rainarai

Renovation of a former gas dividing house into an Algerian restaurant. The main theme is the interaction between Algerian and Dutch architecture. The old Dutch building is filled in with current ecological Algerian materials such as stucco and woodwork. A new cultural spirit is given to the former industrial area.

Willemspoort

2009 Dok Architecten
Client: Municipality Zwolle, ING Real Estate

Redevelopment of a living and commercial area in Zwolle. Development of an urban quality plan and research (history, typology, parking and public space)

Saentower

2009 Dok Architecten
Client: Kantoortoren Zaanstad VOF

Commercially attractive space with shops, offices and apartments at the existing Saentower in Zaandam. Design and technical drawing.

Stadshart Nieuwegein

2008 Dok Architecten
Client: Multi Vastgoed, ING Real Estate

Commercially attractive and lively market square with shops and apartments in the existing Hoogstadplein in Nieuwegein. Design and technical drawing.

OPDC De Saenstroom

2007 Dok Architecten
Client: OVO Zaanstad

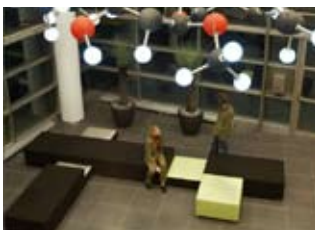

New wooden school building in Wormerveer. Design, technical drawing and aesthetic construction supervision.

Piet Heinbuilding

2007 Slavenburg Construction Company
Client: Amplan development

Design engineering of an office complex in Amsterdam; technical control facades and fundament, technical drawing, logistics, prefab systems and material research.

AKZO Nobel Kantoor

2006 Fokkema Architecten
Client: AKZO Nobel

Interior design of an innovative work environment and product design of a lighting design in an office in Amersfoort.
